

HACKRICE SPONSORSHIPS

WHAT'S THIS?

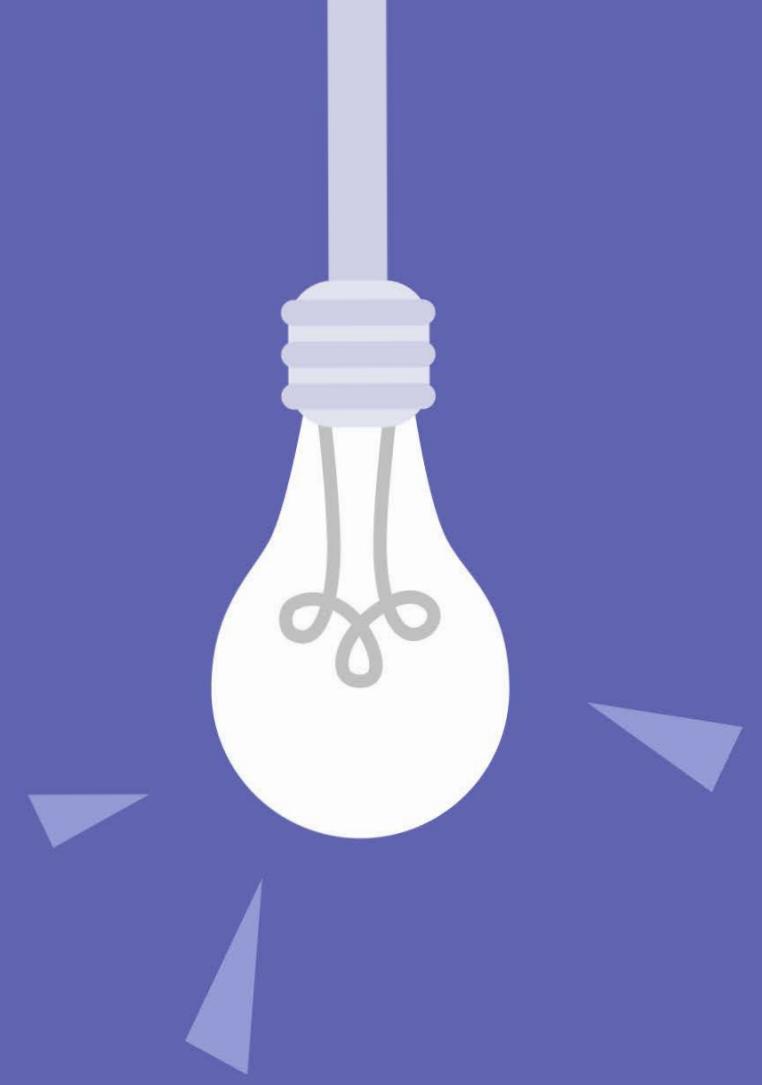

Hackathons **empower students** to start innovative companies and build transformative technologies which can touch millions.

We want to **enable hackers** to build with access to modern platforms, industry-standard tools, and world-class mentorship.

Last year, HackRice brought together **400 coders & designers**, resulting in **58 projects**.

This year, we aim to bring together an even more **competitive & diverse** group.

We need your help! Read more ↓

WHY?

As a sponsor, you are granted access to unique opportunities:

RECRUIT the most ambitious talent from a top-10 engineering school.

EVALUATE candidates as they develop a product under competitive and collaborative variables.

SHOWCASE your tech with a product expo, or work with us to plan a dedicated workshop.

ENABLE developers and designers to build with your platform.

Interested? Choose a sponsorship tier ↓
